Although the robbery evidently occurred last night the discovery of the loss was not made until today when Mrs. Whitehouse instructed her maid to bring her pearls from the jewel cabinet. Then it was found that the cabinet had been looted.

Mr. Whitehouse, interviewed at his brokerage office on 5th avenue, said that the robbery evidently had taken place while he was discussing with other guests of Mrs. Mills the efficacy of burglar alarms.

Mr. Whitehouse said detectives were convinced that the \$50,000 haul was an "inside job." All the servants are being questioned. The jewels taken included a \$28,000 pearl necklace, a pear shaped pair of pearl and diamond earrings, valued at \$6,000; a pair of pearl button earrings, studded with diamonds, valued at \$1,100; a diamond and emerald pin, a diamond and crystal pin, a diamond and emerald brooch in the semblance of a fox terrier, and a pair of imitation emerald earrings. rier, and a pair of imitation emerald

In PARIS... Beauty Capital of the World

The leading experts advise one soap and only one... to safeguard beauty

PARIS! The natural place to go for advice on beauty.

And here all the leaders in Parisian beauty culture agree on one soap as best, Palmolive!

They echo the opinion of the distinguished Lina Cavalieri, that "Palmolive, by cleansing the pores thoroughly, leaves the skin in a smooth healthy condition."

Specialists to royalty, aristocracy

The list of patrons attended by these well-known Parisian experts includes Her Majesty, the Queen of England; Her Majesty, the Queen of Spain; the Infanta, Princess Eulalia, and numerous personalities in the world of open and the theatre, as well as women of wealth and social position from many lands. They all learn, in Paris, how to retain a youthful complexion by the twice-a-day use of Palmolive Soap.

How to use Palmolive

The treatment is so sopple, when one considers the effective results it brings. Massage a lather of Palmolive Soap and warm water gently into the pores. Rinse, with warm water, graduated to cold. Then and then only, are you

ready for make-up.

In America, alone, there are over 15,000 beauty specialists who advocate this palm and olive oil facial soap. And their patrons use it, of course,

has made Palmolive one of the two leading beauty soaps in France... the very first toilet soap in America and 48 other countries.

Think of it! 15,525 professional beauty experts in America alone endorse the regular use of Palmolive Soap!

THE COMBINATION OF THE

# CHICAGO TRUST COMPANY

AND

# The National Bank of the. CHICAGO

Effective Next Monday July 1, 1929

THROUGH the combination of the CHICAGO TRUST COMPANY and THE NATIONAL BANK OF THE REPUBLIC, which becomes effective on Monday, the customers of both banks, as well as the public as a whole, will be given a banking service so complete and comprehensive that it will mark, in reality, a new era in Chicago banking.

Under the combination, THE NATIONAL BANK OF THE REPUBLIC becomes the third largest bank in Chicago; the CHICAGO TRUST COMPANY continues as one of the great trust companies of the country; and THE NATIONAL REPUBLIC COMPANY becomes a greater leader in the investment field.

The combination means more than a matter of figures. It means more than a mere uniting of resources. It means, first and foremost, an alliance of ideas and ideals, with all of the old faces, all of the old friends and all of the old associations remaining. It means that the "homey," friendly atmosphere of both banks will be as much a part of the greater banks as it has always been in the past.

It is in this spirit that we ask the privilege of greeting you on Monday, at which time the combination becomes effective.

Today THE TRIBUNE presents the Lillian Quaden, 100 32d-st. Milwaukes, sound group of winners in its more. Krs. T. L. Sherburne, 337 Abbott-rd., East ond group of winners in its movie star crossword puzzles game, for which cash prizes totaling \$5,000 are being distributed among 430 contest-

Heading the .list of winners announced today is Marcella E. Com-stock, 613 South Randolph street, Macomb, Ill., who receives the second prize of \$500 for her solutions. For forty-two consecutive days THE TRIBUNE printed a series of movie star crossword puzzles, each puzzle containing the name of a famous film actress. The \$5,000 in cash prizes is to go to the 430 persons who sent in the nearest correctly solved complete sets of puzzles. It was not necessary to solve each of the forty-two puzzles completely, how-

ever, to be winner.
Rules of the contest also required ach contestant to write a letter tell ing, in fifty wards or less, which of the forty-two film favorites he considered the greatest and why. Today's prize list follows:

## Gibson Ends Conference with Dawes in London.

#### SPEED ARMS MEET PLANS

[Chiesgo Tribune Press Service.]
Washington, D. C., June 27.—[Special.]—American preparations for participation in the next naval reduction conference were speeded up today as dispatches from London continued to indicate that Ramsay MacDonald, the

Indicate that Ramsay MacDonald, the British premier, will call an international parley to be held in London some time this fall.

It was admitted in the highest circles that an early conference participated in by the United States, Great Britain, Japan, and probably France and Italy, appears to be in immediate prospect. Official warned, however, that the naval situation at present is in such a state of flux that anything may happen, even postponement of the conference until a later date.

Dawes Is Advised.

In order to facilitate naval steps planned by the British government, Washington officials have informed Ambassador Charles G. Dawes that he is at liberty to advise Premier MacDonald that President Hoover is

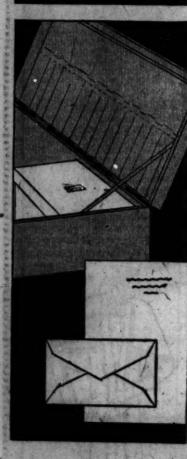

he is at liberty to advise Premier MacDonald that President Hoover is ready to cooperate in any reasonable plan for holding a naval reduction conference in the near future.

It was learned, however, that in translating instructions to the American ambassador, Mr. Dawes was advised to proceed cautiously so as to assure that when a conference is finally arranged it will have a reasonable chance for success.

The British government is carrying on rapid-fire negotiations with the diplomatic representatives of the United States, France, Japan, and Italy. And thus far, according to reports received at the state department, no disagreements regarding the subject matter to be discussed at the projected conference have developed of sufficient importance to peril the holding of the parley.

Questions arising at the ambassadors' conferences in Lindon are being cabled to home governments and action by Premier MacDonald is expected as soon as the five powers, or possibly only the United States, Great

"WASTING ASSET."

An article in a recent number of the Lo nancial weekly, the Statist, referred to the British West Indies as a "wasting asset." Their ndition is described as a "reproach to the emoire after the very long period we have held these extending in the case of Jamaica, for example, over centuries."

On the mainland are British Guiana and British Honduras. They are "a difficult proposition to those who are responsible for their administra tion and of very little value," though British Guiana alone is, in area, larger than England, Scotland and Wales together, and is rich in natural resources. Under present political and economic arrangements, the future, it is confessed, holds no promise of improvement.

The Statist suggests that the West Indian possessions can realize their possibilities only if there is rapid and regular steamship service between the islands and the mainland and British home ports. This is put forward as the only hope and with commendable frankness it is then admitted that the hope is an elusive one. "Nothing of the kind exists," it is stated, "nor can it exist under prevailing conditions, because a steamship company which would run an adequate service, say, from London or Southampton to British Guiana and British Honduras and connecting up the various West Indian possessions would very soon cease to be a shipping company, as it could not hope to obtain either freight or passenger traffic which would justify such a service.

There are many kinds of backach and many causes thereof. If a person is subject to backache he must not stop with a superficial diagnosis. The firs step towards getting rid of his trouble is to find out the cause. In a study of 104 cases Dr. G. T. Lambrocht found 13 were due to trouble in the lower part of the back. Six of these were due to strain of the ligaments between the backbone and the pelvis, three to neuralgia of the lumbar nerves, two to neuritis of the nerve roots and one to fault in the bone or joints of the lower end of the spinal column. Disorders of the falling of the abdominal organs three About sixty per cent of all the cases were said to be systemic. The back was aching for sins committed elsewhere in the body, often in some faraway part.

Chronic foci of infection were charged with twenty-three cases. In other words, such infections cause more than one-fifth of all the chronic backaches. Arthritis deformans was charged with twelve cases; goiter and other thyroid troubles with ten. The miscellaneous remainder of the group of sixty cases were charged against Bright's disease, indigestion and a few other disorders.

A Rum Omelet Without Rum.

We had given up hopes of ever again eating um omelet. For we are not one of those who thumb their noses at the eighteenth amendment or anything horrible like that, but devoted, law-abid ing American citizens. But the other evening Jas per dropped around. He has often heard us raving about the rum omelet we had five or six years ago down in Monterey, Mexico, and how excited we were when the saddle colored waiter marched into the dining room bearing aloft a silver dish from which beautiful tongues of blue and red and green and purple flame shot high into the air. It was rum omelet. Ah, how solemnly the waiter deposite the spectacular affair on a table near us, skillfully blew out the fireworks, and then scooped up the delectable sauce, made of the burning rum and powdered sugar, and poured it reverently over the nelet. Oh, heavenly dish, a food for the gods!

Well, Jasper dropped around the other evening and he said, "Got any eggs?" We had boocoo eggs. "Make a rum omelet," said /Jasper. "Oh, Jasper," said we, reproachfully, "in the first place it would be a violation of the law of our land, and in the fourth place we haven't any rum." "Make the omelet," said Jasper; "I have a substitute for rum in this little bottle. You make the omelet and then leave me alone with it for a half a minute. What I do to the omelet is my own business. We made the omelet and then left the room. W did not wish to be accessories to the crime. Then Jasper appeared, bearing the omelet, and on it and around it and about it the blue and red and green and purple flames danced joyously, exactly as they had done around the omelet in Monterey. Finally Jasper blew out the flames and spooned up the sauce and poured it over the omelet. Oh, it was a lovely omelet. "Perfect!" said we to Jasper: "it tasted just like the rum omelet we had in Mexico. What did you use to get such a perfect taste so like rum?" "Extract of lemon," said Jasper, "saturated with gunpowder." So that was it. We were so glad he didn't put rum in the rum omelet.

IT'S SOMETHING for Charley Dawes and Ramsay MacDonald to think about. It's a plan by which Great Britain and the U. S. A. can make an effective naval agreement very readily. England wants more cruisers and the U. S. A. wants more of its gels presented at court. All right, let England have one more cruiser than the U.S. A. for every fifty gels presented at St. James. Or a hundred, or a hundred and fifty, whatever we can get. Then both countries will be happy. Or, won't they?

on a memorandum prepared by advocates of the lakes to the gulf waterway which stated:
"It seems that a treaty of the char-

DAILY the letters pour in telling how IRONIZED YEAST has quickly made REAL MEN out of "skinny" weaklings. They gained 5 to 15 pounds in a few short weeks. Their muscles rounded out. They gained new strength and energy; a manly color and a clear, robust skin.

Sunken cheeks, which always age one, filled out so that many write: "I now look 10 years younger." Results are guaranteed by your own druggist—or pay nothing.

How and Why IRONIZED YEAST Adds Weight and Vigor So Quickly

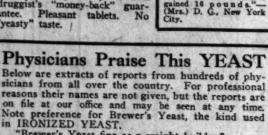

IRONIZED YEAST is two great tonics in one. Weight-building YEAST and strengthening, blood-enriching IRON. The Yeast is the kind used in making malt and which makes malt so beneficial. We concentrate this yeast so that 12 Sacks of raw, live YEAST make only ½ Sack of the concentrate which goes into IRONIZED YEAST. You can easily see why each small tablet of this new IRONIZED YEAST gives you quick, EXTRA, weight-building results through this 24-to-1 concentration.

This Yeast is treated with two kinds of Iron used for years by the highest medical authorities. Iron enriches the blood; tones up nerves and muscles.

The Yeast is further treated with Violet Rays, the latest scientific discovery, which increases its energizing and weight-building malities. Only when Yeast is thus Ironized is it most effective. Iron is needed to bring out the weight-building, strengthening values of Yeast.

By this special formula, IRONIZED YEAST gives you results half the time required by Yeast or Iron taken separately.

Don't be "skinny" or weak any longer. Have a real man's arms and legs and a clear, ruddy complexion. Get IRONIZED YEAST today on your own druggist's "money-back" guarantee. Pleasant tablets. No "yeasty" taste.

# She!

THERE once were dress buyers who said that no decent woman would wear knee-length dresses. But decent women went from long skirts to bare legs in ten years... Footwear once meant high shoes, of leather, but now is simply the smart and spare accessories to a color scheme, and made of anything from paper to metal... After seeing cotton superseded by silk, there were merchants who saw no

future for rayon...And corsets!

Priced from 98c to \$5.00 and up.

Every lady wore one. Then she
didn't, and almost wrecked an in-

dustry. Then she went in for variations and now wears three times as many at three times the price ... Underwear used to be cotton or woolen, and the leg length was very important... Modernistic furniture afforded sensational magazine pictures. And the furniture trade said "Nobody is ever going to want the goofy looking square stuff." But it is stocked in every furniture store today... Color came into the kitchen, the bathroom, the basement; and every crossroads hardware store has had to carry six colors of the same coffee pot and paring knife...

And you may remember the time when floppy hats were always "in," radio was a toy, 98c was the upstairs limit for cosmetics, and department

She gets what She wants! She turns queer ideas into commercial institutions, and established institutions into antiquated illusions. She sends trade customs crashing and makes merchandising a merry-go-round!

And you manufacturers and merchants—ain't you had fun the last ten years? You make and stock what she wants, too, or your business takes an alarming kick in the slats.

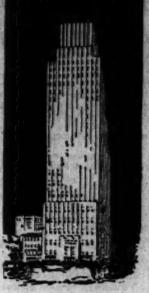

So we respectfully call your attention to something

else She wants in New York—The News. Ten years ago we started in the publishing business in this town, serving nice, fresh, condensed news,

extra quality pictures, extra well printed, and a line of first class features and miscellaneous worthwhile services. We had a small package that was a considerable novelty then. The older newspaper merchants didn't think much of it—

But the ladies—bless 'em—did! They came up in droves every morning and laid down their money. They made The News known as a woman's paper. At one time the polite fiction prevailed that no male ever bought a News for his own consumption—"It's my wife's favorite newspaper." They keep it on the newsstands all day; it is the only New York morning paper you can buy in New York at 5:00 P.M. They cause it to be carried home night after night. They keep it alive as an advertising medium hours after it is dead as a newspaper. They buy more patterns from The News than they do from most women's magazines. The letters they write and the calls they

THE new News Building at 220 E. Forty-second St., New York. Thirty-six stories high, and in the modern

make upon our service departments constitute a record of responsiveness unequalled in the publishing business.

Yet The News is not particularly
a woman's newspaper. It has no separate women's
pages, no special preoccupation with cook stove,
clothes, church or children and the other interests
presumably peculiar to women. Nevertheless, with
a daily circulation of more than 1,300,000 copies,
40% of the newsstand buyers are women. (These
are just the women who buy their own; the others
have purchasing agents.)

Consequently, The News reaches more women than any other newspaper in America and probably more than all the other New York morning newspapers

York women in the high income families than any other magazine or general, publication.

Because The News is small in size, condensed in content, convenient and time-saving, The News is really read by this woman audience. Their reading makes it a really wonderful advertising medium—that has broken sales records for cosmetics, savings accounts, furniture, musical instruments, food, real estate, wearing apparel. This year, while New York department stores are using less space in most newspapers, they are using more in The News.

She wants The News—so you might as well stock it. It pays to give the customers what they want! And you can reach the eye, interests and instincts of the metropolitan market of women—more easily, more quickly and more cheaply through The News than any other way.

S EARLY as 1926 the United States set a record of 6,000,000 miles flown in commerce during a single year, surpassing all other nations. This year aircraft production is placed at three times the 1928 output. Michigan manufacturers of engines and motor parts form one of the major sources of supply for powering these planes.

Michigan contributed the first successful Diesel engine for flying, instituted the first exclusive air passenger service in America, has twenty-one aeronautical manufacturers, while five important Michigan motor companies supply aircraft engines.

## \$6,000,000 State of Rio de Janeiro

(United States of Brazil)

External Thirty-Year 61/2% Secured Sinking Fund Gold Bonds of 1929

A cumulative semi-annual Sinking Fund is provided to commence operation July 1, 1931, calculated to redeem the entire issue by maturity through semi-annual drawings at 100 and accrued interest.

The State of Rio de Janeiro with an estimated population of 2,000,000 ls a southern maritime state located in the most important commercial section of Brazil, is 26,635 square miles in area, and is situated east of Sao Paulo and south of Minas Geraes. It is the most densely populated state of Brazil and surrounds the Federal District in which the City of Rio de Janeiro, the capital of Brazil, is situated, but is politically distinct from it. The most densely populated state of Brazil and surrounds the first from its Theorem in The most densely populated state of Brazil and surrounds the distinct from its Theorem in Theorem is the second population of the second p distinct from it. The capital of the State, Nictheroy, a city of over 100,000 inhabitants, is located across the Bay from Rio de Janeiro and is connected therewith by ferry.

All foreign trade moving by rail between the Port of Rio de Janeiro and the interior states must pass through the State of Rio de Janeiro which has widely diversified agricultural and pastoral production. The State stands second in Brazil in the production of sugar and salt and third in coffee and ranks next to Sao Paulo in manufacturing. In proportion to its area, the railroad mileage within the State (1,763 miles) is larger than that of any other state in Brazil. These roads connect with the important railways of Sao Paulo, Minas Geraes and Espirito Santo. The State has, besides the Harbor of Rio, a number of smaller ports which

Industrial growth has been rapid, due to readily available cheap power, (the installed capacity of hydroelectric power in the State exceeds 300,000 horsepower and the potential reserve is estimated at over 1,000,000 horsepower) and also to its proximity to the City of Rio de Janeiro which has about 1,650,000 inhabitants and provides an outlet for the principal products of the State.

Finances: The ordinary revenues and ordinary expenditures for recent years have been as follows: 1929 (Estimated) 5,683,320

From 1925 to 1928 the State had an actual surplus of ordinary revenues over ordinary expenditures of \$5,269,440, which together with the proceeds of the 7% Sterling Loan of 1927 and certain short term financ-

ing was used for capital investments of over \$15,300,000. After completion of this financing there will be outstanding a total funded Internal and External debt equivalent to \$28,450,231. In addition thereto, the State has guaranteed municipal indebtedness amounting to approximately the equivalent of \$3,888,000. As of May 15, 1929, the floating debt of the State was equivalent to \$1,292,048. After this financing the per capita debt of the State will amount to about \$16.80.

There is no record of default on any obligation either internal or external of the State of Rio de Janeiro. Security: These bonds constitute the direct, unconditional and valid obligation of the State of Rio de Janeiro, which pledges its full faith and credit for the due and punctual payment of the principal and interest thereof, and in addition these bonds will be specifically secured by:

(1) A first lien and charge (ranking pari passu with the 51/2% Conversion Sterling Loan of 1927 and the 7% Sterling Loan of 1927, together aggregating approximately \$17,992,400, but in priority to all other liess and charges hereafter created by the State) on the following taxes: (a) Export tax; (b) Stamp and Transfer taxes; (c) Land tax and taxes on Industries and Professions; (d) Special tax on Salt; (e) A newly created 10% Surtax on all taxes; and on taxes in accord with Law number 2262 of January 21, 1928 and Decree number 2293 of January 27, 1928 and

(2) A second lien and charge (subject to the specific charges in favor of the 5½% Conversion Sterling Loan of 1927 and the 7% Sterling Loan of 1927, above mentioned, but in priority to all other charges hereafter created by the State) on the Additional Sugar tax, and on the Coffee and Sugar Gold Export taxes.

Revenues from these taxes for the years 1925, 1926, 1927 and 1928 averaged \$4,603,440 per annum, which is over 2½ times the \$468,066 maximum service requirements of the present loan and the \$1,348,218 service requirements of the 5½% and 7% Sterling Loans of 1927. After the payment of the service of the 5½% and 7% Sterling Loans there remains an average of \$3,255,222 per annum available, which is equal to about seven times the maximum service requirements of this loan. The 1929 Budget estimate for the above pledged revenues total \$5,073,840, which is over 2.75 times the service requirements of the present loan and the Sterling Loans, or approximately eight times the maximum requirements of this loan after the payment of the service of the Sterling Loans. service of the Sterling Loans.

The State covenants to maintain and enforce these taxes at rates which will produce revenues aggregating in each fiscal year at least twice the annual service charges on these Bonds and on the 5½% Conversion Sterling Loan of 1927 and the 7% Sterling Loan of 1927, above mentioned, and that if the aggregate amount of revenues pledged as security for these bonds should be appropriate to the service of the servi charges it will assign and pledge as additional security on the same terms as above, other taxes or revenues producing an annual amount sufficient to cover such deficiency.

The State further covenants that, so long as any of the Bonds of this issue remain outstanding, any further lien or charge upon the specific security above mentioned, in favor of any external, internal or other loan or obligation hereafter contracted by the State, shall be expressly subject and subordinate to the lien and charge created for the benefit of these Bonds; and that, in the event of the creation hereafter by the State of any such loan or obligation secured by a lien or charge upon or mortgage or pledge of any of its other revenues or properties, these Bonds shall have the benefit, pari passu with any such loan, of any such lien, charge, mortgage or pledge.

Purpose: The proceeds of this loan will be used for retiring the External 5% Sterling Loan of 1912, an extensive sanitation and colonization program, the construction of a canal to afford inland transportation and the building of roads. It is estimated that the State, upon completion of the above mentioned works, will derive revenues therefrom of over \$600,000 per annum. The Engineers Corporation, a subsidiary of and guaranteed by The J. G. White Engineering Corporation, under agreement with the State of Rio de Janeiro and the State's Administrator of the work to be constructed, will act as Consulting Engineer and also as Purchasing Agent in New York. All conversions from milreis into dollars have been made at the rate of 12c per milreis and from pound sterling into dollars at \$4.36 per pound sterling.

Application will be made to list these Bonds on the New York Stock Exchange.

Price 911/2 and accrued interest. Yield to maturity 7.20%

A substantial portion of this issue is being taken in the European market including \$1,000,000 which is being publicly effered by the Incasso Bank, and Vermeer & Co., Amsterdam, who will make application to list these bonds on the Amsterdam Exchange. sters in connection with this issue will be passed upon by Mesers. Hornblower, Miller & Garrisch, New York, for the Bankers. All a pertaining to Brazilian Lew will be passed upon by Mr. Richard P. Mamsen of Rio de Iduciro. These Bonds are offered, when, as and if issued and exceived by us and subject to approval of counsel. It is expected that Trust Receipts will be ready for delivery on July 1, 1929.

Cuttle-fish Tactics of Reserve Board "WALL STREET and WASHINGTON"

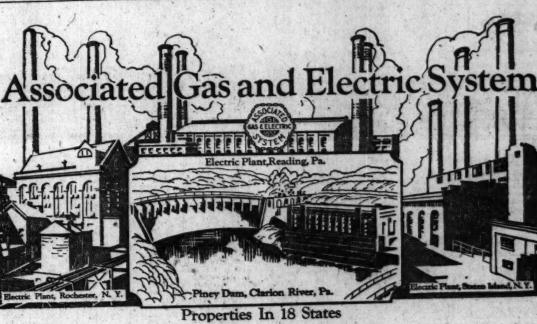

by JOSEPH STAGE LAWRENCE

THE guardian trustees of our ultimate banking reserves have abused their power and broken faith with the business and banking community. Impelled by fear to go where reason and justice failed to show the way they have placed the American investor on the sacrificial altar to appease these turbulent spirits of purity and virtue who adorn the "most august" legislative chamber on earth.

The cuttle-fish tactics of the authorities have confused the issues. Here is a book that tears aside the dark veil of dissimulation and reveals the ugly forces at the base of Federal reserve policy.

Rinso is recommended by the makers of 36 leading washers

If you want to see how clothes can gleam—try Rinso in your washer. Its suds are so thick and cleansing dirt and most stains loosen, rinse away. The grimiest cuffs and edges come snowy with little or no rubbing! Even boiling isn't needed. No wonder the makers of 36 leading washers say, "Use Rinso for safety and for whiter washes."

Great for tub washing, too. Saves scrubbing. Clothes last much longer. Hands are spared. Granulated, compact one cupful of Rinso gives more suds than two cupfuls of lightweight soaps.

#### Germans Explain Why Married People Live the Longest Belta ! BY DORIS BLAKE.

statisticians to take the ro

If there is anything to destroy the romance of the bachelor who pines in single blessedness forsever over the girl he didn't get, it's the German disclosure that the reason the married ones live longest is that they are the healthiest to begin with. "Weaklings—from a medical standpoint, that is—and people suffering from diseases frequently do not marry. And it must be taken for granted that of the latter category more die at an earlier age of life than the healthy, or those who marry." That is the disconcerting converse. That is the disconcerting con-

chusion.

Married persons live five years longer, on the average, than those who never have experienced the delight of being brought before a clergyman while a woman waits to take him in charge. Married persons, in fact, German statistics report, can count on living to 69, while bachelors and spinsters must be content with a promise of 64 years only.

Don't get humorous, please, about what could be done with the extra five years more will mean just as much as five years more when you're 30.

Home life with its regularity was given a good round count in arguments pro and con the longevity question. The roving bachelor [he can't expect to live down that reputation of his for restlessness] suffers the loss of five good years because of irregularity of hours, meals, and so on.

Perhaps the German scientists have not reckoned on that new type of bachelor America knows who runs his house or apartment on schedule and whose hope for greater and greater longevity rests with escape from the annoying conflicts that modern woman threatens in a man's life.

of age.

"Last year only 450 children went
to farm and small town homes," Mr.
Blekham said. "We anticipate almost doubling that number this year through the new placing system. There is more interest, too, among people who are finding out for the first time how much good such outings accomplish."

Three parties, totaling sixty-five children, will leave on Tuesday to spend two to six weeks in pure country air, where they may ride horses milk cows, swim and fish to their hearts' content. O. G. Briggs, editor of the Albany Herald and chairman of the Green county, Wis., committee, will come to Chicago to see that the twenty children allotted to his county get safely to their destination. The party will leave at 5:15 p. m. from the Union station on a special car provided by the Chicago, Milwaukee, St. Paul and Pacific railroad.

The same day a party of 20 will leave over the Chicago, Burlington and Quincy for Schuyler county, Ill., for Rushville and Camden. Another group of 25 will go over the same cilroad to McDonough county, arriv ing at Macomb.

Another pair I used to know built their big nest for several years near the top of a little weak cedar. The tree never grew much, and every year the strong winds bent the tree over so that the eggs fell out.

The phoebes didn't do much better than the robins. During the time we were watching them they built such small nests in such a poorly chosen place on a support of the porch that when their six eggs hatched out the little nest simply wouldn't hold the nestlings. As they grew they actually pushed each other out of the nest. ly pushed each other out of the nest. Our efforts to save them were unavailing. For two or three years we saw each whole brood wiped out.

In our experience the robins and the phoebes are very poor builders. Their intentions are very good—but that doesn't help their babies.

"She means well—but that's all," used to be the most derogatory thing a friend of mine could say of any one. She means well. But that isn't enough. The same idea is in the famous description of the paving stones

mous description of the paving stones of the nether regions, Good inten-tions—meaning well—I suppose they both show a nice feeling. But they don't accomplish results.

This may sound a little harsh, but where our children are concerned we meed to be hard on ourselves. And it's in connection with our children that I'm thinking of good intentions, "She meant to be a good mother, but she didn't know how. He meant to be a good father, but he didn't

we mustn't let that be said of us.
Is our business to know.
We mustn't let good intentions take the place of getting results. We do need the good intentions, but we must translate them into action. We'll do this by thinking about the children, by knowing what is going on in their lives, by helping them to get what they need most, and by always having time for them. ing time for them.
